

Extension Service District Significant Changes

- FY21 will begin a new approach to handling the service district dollars between the two departments (Extension and Research). Beginning this year all monies for extension will be billed on actuals, leaving all of their unspent allocation at the county. Research will bill their entire allocation and will keep their savings at OSU. This will help alleviate confusion on savings between the two departments. Also beginning from FY21 forward there will be a 70/30 split between the departments with Extension receiving 70% of the tax revenue and Research receiving 30%.
