Oregon reports 775 new confirmed and presumptive COVID-19 cases, 13 new deaths

PORTLAND, Ore. — There are 13 new COVID-19 related deaths in Oregon, raising the state's death toll to 1,877, the Oregon Health Authority reported at 12:01 a.m. today.

Oregon Health Authority reported 775 new confirmed and presumptive cases of COVID-19 as of 12:01 a.m. today, bringing the state total to 137,600.

Vaccinations in Oregon

Today, OHA reported that 15,461 new doses of COVID-19 vaccinations were added to the state immunization registry. Of this total, 11,151 vaccine doses were administered on Jan. 22 and 4,310 were administered on previous days but were entered into the vaccine registry on Jan. 22.

Cumulative daily totals can take several days to finalize because providers have 72 hours to report doses administered and technical challenges have caused many providers to lag in their reporting. OHA has been providing technical support to vaccination sites to improve the timeliness of their data entry into the state's ALERT Immunization Information System (IIS).

Oregon has now administered a cumulative total of 285,914 first and second doses of COVID-19 vaccines. All vaccinations were administered by Oregon hospitals, long-term care facilities, emergency medical service (EMS) agencies, urgent care facilities and Local Public Health Authorities (LPHAs).

To date, 492,450 doses of vaccine have been delivered to sites across Oregon.

These data are preliminary and subject to change. OHA's [dashboards](#) provide regularly updated vaccination data and Oregon's dashboard has been updated today.

COVID-19 hospitalizations

The number of hospitalized patients with COVID-19 across Oregon is 310, which is seven fewer than yesterday. There are 83 COVID-19 patients in intensive care unit (ICU) beds, which is four more than yesterday.

The total number of patients in hospital beds may fluctuate between report times. The numbers do not reflect admissions per day, nor the length of hospital stay. Staffing limitations are not captured in this data and may further limit bed capacity.

Cases and deaths

Note: Updated information is available about Oregon's 1,798th COVID-19 related death, which was reported Jan. 16 as a 71-year-old man in Jackson County. The updated death certificate does not list COVID-19 disease or SARS-CoV-2 as a cause of death or as a significant condition that contributed to his death, and he is no longer considered a COVID-19 related death or case.

Because of this error we are renumbering our reported deaths starting with 1,865 today.
