Oregon reports 474 new confirmed and presumptive COVID-19 cases, 43 new deaths

PORTLAND, Ore. — There are 43 new COVID-19 related deaths in Oregon, raising the state's death toll to 2,137 the Oregon Health Authority reported at 12:01 a.m. today.

Oregon Health Authority reported 474 new confirmed and presumptive cases of COVID-19 as of 12:01 a.m. today bringing the state total to 150,034.

Vaccinations in Oregon

Today, OHA reported that 20,386 new doses of COVID-19 vaccinations were added to the state immunization registry. Of this total, 11,783 doses were administered on Feb. 12 and 8,603 were administered on previous days but were entered into the vaccine registry on Feb. 12.

Cumulative daily totals can take several days to finalize because providers have 72 hours to report doses administered and technical challenges have caused many providers to lag in their reporting. OHA has been providing technical support to vaccination sites to improve the timeliness of their data entry into the state's ALERT Immunization Information System (IIS).

Oregon has now administered a cumulative total of 669,988 first and second doses of COVID-19 vaccines. To date, 885,250 doses of vaccine have been delivered to sites across Oregon.

These data are preliminary and subject to change. OHA's [dashboards](#) provide regularly updated vaccination data, and Oregon's dashboard has been updated today.

COVID-19 hospitalizations

The number of hospitalized patients with COVID-19 across Oregon is 216, which is 14 more than yesterday. There are 49 COVID-19 patients in intensive care unit (ICU) beds, which is one more than yesterday.

The total number of patients in hospital beds may fluctuate between report times. The numbers do not reflect admissions per day, nor the length of hospital stay. Staffing limitations are not captured in this data and may further limit bed capacity.

[More information about hospital capacity can be found here.](#)
