To Erik and the Klamath County Planning Commission,
I was able to read the siting standards for commercial solar facilities you sent out to various individuals in July. As it seems that solar panel builds are going to be part of our landscape, I think the ordinance you are building is crucial. I am grateful to see you are working on this, I only wish we had it in place two years ago before Hecate placed their claim on our valley.

Once you have adopted this ordinance, I hope we can submit it to the Oregon Department of Energy Siting Council for their consideration of what should, and should not be allowed in our rural communities when approving Solar Builds. The Hecate Bonanza Energy Facility goes against almost every guideline that you have written to protect our local resources.

Thank you for working on this,
Elizabeth Hubbard

Hi Erik,

I do have one thing I would like to add to my previous email. I think it might be a good idea to add some restrictions for how close a facility with a large battery storage can build to a school or hospital. Hecate is putting in 90 acres of battery storage within two miles of Bonanza Schools. The recent Tesla battery fire in Australia should be a cautionary tale for us. The fumes from such a fire are dangerous.

Thanks,

Elizabeth Hubbard
